GREENVILLE CITY FIRE DEPARTMENT RESPONDS TO FUEL LEAK

(Greenville SC – Feb. 17, 2015) The Greenville City Fire Department's HAZMAT Team responded to Shriners Hospital for Children this morning, and upon arrival, found diesel fuel emitting from a storm drain. Once it was determined that the fuel had traveled out of the city's jurisdiction, downstream departments were notified. The fuel had made it as far as Lake Conestee. DHEC was among the agencies on-site today, and the EPA is expected to respond tomorrow or Friday.

The Greenville City Fire Department will continue to monitor the situation and provide on-site support.
